

SRP 2-WAY REPEATER SERIES

Icom's best value repeater!

Icom SRP repeaters combine two IC-F110S/IC-F210S mobile radios and can be used as compact VHF to VHF, UHF to UHF, or crossband repeaters. You can instantly re-transmit received audio without any noticeable delay, extending the operating range of a radio scheme even further. Designed to enhance coverage of a two-way radio system, Icom SRP repeaters can be added to other existing radio systems. All repeaters in this series provide a stable 25 watt output power allowing a radio scheme to be boosted beyond the range of normal Private Mobile Radio (PMR) networks.

Major selling points...

- Available as a VHF, UHF or crossband (VHF and UHF) repeater, enclosure and 240V PSU included.
- Ideal for emergency services vehicles.
- Extremely compact and portable.
- Two antenna working as standard
- Optional duplexer can be fitted
- Can run from a 12 volt supply.
- Vehicle or desk-mountable.
- CTCSS signalling.
- Great value!
